

Our day at Wendover

Year seven went on a trip to Wendover for the study of local recreational facilities. During the day we received a booklet that we had to fill out during the time we were there. We marked out Wendover land marks including: A sculpture, barbeque sights and a field sketch looking to the western direction.

We also looked out for animal signs including: nests, mammal droppings, bird songs, and nibbled fungi. Some of these objects came in handy when doing the scavenger hunt. We judged the environmental quality of all seven sites and did a pedestrian count, to see if there was a link between the two.

Later in the day we stopped t the café to have some food and a drink. That was followed by an orienteering activity that led us to the woods, where we measured the girth of the trees to see which had the largest and the smallest.

We enjoyed our trip to Wendover as it gave us a good in sight into the life of nature in Wendover woods.
